GBA Announces Formation of a New Business Advisory Board to Help Future Growth

Westbury, NY, July 8, 2008 – Game Builders Academy (GBA) held today the inaugural meeting of its newly created GBA Business Advisory Board. This board is anticipated to play a vital role in helping guide GBA to new levels of growth on a local, regional and national level.

After a several month search and evaluation process, invitations were extended to three diverse, distinguished and accomplished business leaders. All enthusiastically accepted GBA's invitation. The new advisory board members are:

- **Dean Bennett** – Deputy Director, Nassau County Office of Minority Affairs.
- **Barbara Viola** – President, Viotech Solutions, Inc.; President, Association of Information Technology Professionals, LI Chapter.
- **James Cullen** – Director of Sales, Marketing & Membership Services, Long Island Association, Inc.

With the formation of this new advisory board, GBA expects to accelerate its planning process for regional and national growth. Locally, GBA now claims an impressive list of nine distinguished education institution clients where it has contracts for its services.

About Game Builders Academy

Headquartered in Westbury, New York, Game Builders Academy (GBA) is a STEM-based educational services and products provider of innovative, technology-based instruction – primarily for students in grades 5 through 12 – that help students learn, grow, have fun and succeed! GBA's initial instructional programs have been based on video game design and development, robotics, and digital music composition. A GBA *Starburst*[™] offering in video game development is specifically designed for early childhood students in grades K through 4. Additional new programs are in development for future release. GBA's clients include public and private schools, college-based youth programs, as well as summer academic camps. Its products have been integrated within regular and gifted daytime school curricula, after-school and weekend programs, and summer youth activities.
