Game Builders Academy Achieves Record Summer Enrollment

Westbury, NY, August 25, 2008 – Game Builders Academy (GBA) announced today impressive record growth in its highly successful technology-based summer academic programs. Overall annual growth also continues to improve at a significant rate.

GBA offered multi-level programs in video game design and development and its basic Robotic program to approximately 600 boys and girls this summer through various schools in the Long Island / New York City area. This achievement amounts to a greater than 100% growth over last summer. Through just the first eight months of 2008, GBA has already increased total program registrations over the entire previous year by more than 85%. Currently scheduled fall programs are expected to push GBA's annual growth to the 100% mark for the entire 2008 year.

During this busy summer period, GBA also presented major presentations highlighting its innovative learning programs to both educators and students. In July, GBA accepted for the second year an invitation from Microsoft to present two workshops to nearly 100 teenage girls at Microsoft's DigiGirlz Technology Summer Program at Stony Brook University. Also in July, GBA presented to educators of gifted and enrichment programs at the annual 'Confratute' Conference at the University of Connecticut.

About Game Builders Academy

Headquartered in Westbury, New York, Game Builders Academy (GBA) is a STEM-based educational services and products provider of innovative, technology-based instruction – primarily for students in grades 5 through 12 – that help students learn, grow, have fun and succeed! GBA's initial instructional programs have been based on video game design and development, and robotics. A GBA *Starburst*[™] offering in video game development is specifically designed for early childhood students in grades K through 4. Additional new programs are in development for future release. GBA's clients include public and private schools, college-based youth programs, as well as summer academic camps. Its programs have been integrated within regular and gifted daytime school curricula, after-school and weekend programs, and summer youth activities.
